GROUND FLOOR PLAN

RIKISHI Security Consulting and Design Services

Protecting People, Property and Structures

Over the next decade, companies, institutions and governments will invest more of their time and capital in security than at any time in our history. Natural disasters, acts of terrorism, crime, infrastructure failures and other security challenges present significant risks — every day, and in every corner of the world.

Rikishi is a complete security solutions provider. Our experts apply knowledge gained from decades of planning and designing secure facilities throughout the world. We understand the range of security risks, and stay current on available methods, technologies and equipment to anticipate and solve these risks. We provide:

- Security Assessment, Needs and Analysis
- Workplace Violence Solutions
- Security Systems Review, Design, Bidding and Construction
- Operations and Implementation
- Specialized Services (Ask how we can help you with your challenges

Rikishi's knowledge of risk management, loss prevention, life safety and security provides a one-stop solution for preserving your organization's investments.

With Owners, Developers and Property Managers, we assess site-specific vulnerabilities and apply best practices in security planning, design and implementation, based on decades of experience in the field. Rikishi's security experts stay current on all new technology and systems, adapting and continuously improving to meet
current and future threats.

With Architects, we collaborate to intuitively address security risks through design process. With early involvement and a consultative approach, Rikishi partners with you from design development through construction. Design aesthetics are preserved, and urgent security issues such as life safety, entry management and door hardware are addressed early in the design phase. We are known for rapid responsiveness and constant communication with project architects and design teams.

With Security Directors and Risk Managers, we are trusted advisors and a continuous resource for needs large and small. From reviewing and validating the need for security to providing innovative solutions to meet budgets, our knowledge of technology and best practices provides practical answers. We review and benchmark every aspect of security operations, equipment, policy and training to protect the assets and integrity of the organization while increasing return-on-investment.
